

Lynco® Conform Orthotics Full Length

Recommended to protect and comfort the diabetic foot and the hyper-sensitive arthritic foot. Constructed with a Plastazote top cover that customizes to the foot during the gait cycle and accommodates pressure "hot spots" for maximum protection. Plastazote X-firm bottom provides superior resilience and shock absorption. Can be easily customized and heat molded for maximum protection and comfort.

The eye-catching, modern Lynco® package is designed for easy comprehension of the features of each Lynco® style to quickly identify the appropriate orthotic for your customer's needs.

Lynco® Orthotics

Lynco® Orthotics are recognized as the #1 orthotic system on the market. They are recommended by doctors and pedorthists worldwide. Millions of pairs have been sold to consumers seeking the quality and support of custom-made orthotics at an over-the-counter price.

Lyncos® are available in a variety of styles to provide your customers with custom solutions based on their specific foot type and footwear style. These orthotics are **all tri-density** with a **molded Pedic core** to support the arch and provide maximum comfort. Options include metatarsal support to provide additional protection at the ball-of-the-foot and/or medial posting to gently realign the rearfoot and control over-pronation.

Lynco® Casual Orthotics Full Length

Designed to provide maximum foot comfort and protection in casual and comfort footwear. These orthotics feature a high-tech Carbosan® top cover that cushions the foot and absorbs shock forces. This innovative material is anti-odor and anti-bacterial to help keep feet in a healthy and clean environment. They are light-weight, resilient and provide unmatched support and stability. These unique orthotics fit comfortably in most footwear.

LEGEND

Forefoot Neutral

Without metatarsal support for those not suffering from ball-of-foot pain.

Forefoot Supported

Metatarsal support comforts ball-of-foot and redistributes weight.

Rearfoot Cupped

Cushions & stabilizes rearfoot. Recommended for medium & high arch.

Rearfoot Posted

Controls pronation & balances rearfoot. Recommended for flat or low arch feet.
