

The Diabetic Casual Crew Sock

Diabetic Casual Crew Socks are "seamless" socks for patients with diabetes, arthritis, edema and other systemic or foot problems. Since each sock is closed by hand, not by machine, there are no toe seams to dig into toes.

Features:

- Non-binding Top.
- Extra Width in Calf.
- Non-Constricting Seamless Toe.
- Antimicrobial Treatment.

Diabetic Dress Rib Socks

-Thinner than the Casual Crew

Knit right to fit right. The Dress Rib has a 9x2 broad rib with a non-constricting 1x1 french top. Each style is 94% cotton and will not constrict the blood flow. The foot of these socks features extra cross stretch to accommodate wide, swollen, or tender feet, built in antimicrobial protection to inhibit the growth of bacteria and fungus, and a seamless hand knit toe to prevent irritation. Not for Diabetics only - Recommended for arthritis, edema, sensitive feet, and wide feet.

French Rib

	Small	Medium	Large
Black	ISE10521	ISE10522	ISE10523
White	ISE10518	ISE10519	ISE10520
Navy	ISE10524	ISE10525	ISE10526

Sock Sizes: S/M (9 - 11), M/L (10 - 13), L/XL (13 - 16) Pr.

Compression Hosiery

What is Gradient Compression Hosiery?

- A Gradient compression product such as Therafirm is produced so that the greatest pressure is exerted at the ankle and decreases gradually and sequentially up the length of the leg. This pressure is measured in millimeters of mercury (mm Hg). These pressures range from 15-21 mm Hg for normal "street wear" type products to the heavier surgical weight in the 21-30 and 30-40 mm Hg for the relief of more serious leg and vein problems.
- Therafirm creates pressure at the ankle which drives the blood flow deep into the circulatory system and back toward the heart. This prevents blood from "pooling in the lower limbs and creating outward pressure, causing damage to the venous valves. This gentle pressure prevents and relieves the discomfort from the pain associated with leg fatigue. *Early use of a gradient compression product will prevent serious leg and vein disorders later in life.*

Women's Sheer Support Knee-Highs 15-21 mm Hg

- Comfortable, fashionable, and practical "Firm Support" to reduce the discomfort of mild varicosities, or the discomfort of tired, aching, swollen legs.
- Features a non-slip, non-restrictive, knit-in band for greater comfort.
- Reciprocated toe/heel, for comfort and durability.
- Available in Fawn and Black

1 pair per package

Size	Shoe Size	Fawn #	Black #
Medium	5.5 - 7.5	68114	68124
Large	8 - 10.5	68115	68125

Women's Sheer Support Pantyhose 15-21 mm Hg

- Designed for today's active and fashion conscious woman. Offering "Firm Support" to reduce the discomfort of mild varicosities, or the discomfort of tired, aching, swollen legs.
- Features reciprocated toe/heel, a figure flattering control top, and soft non-restrictive sewn in wasteband for greater comfort.
