## Arthritic/Diabetic Gel Sock

Silipos arthritic/diabetic sock contains a gel insole that provides added support, cushioning, protection and comfort. The gel helps reduce friction, shear and callus formation. Additional benefits are a seamless toe design and a non-restrictive cuff. The arthritic/diabetic sock also serves as a soft tissue supplement for fat pad atrophy and will conform to the shape of your foot. This sock can be worn with or without diabetic shoes and is washable and reusable. **Pr**

## Soft Sock Gel Sock

This double layer sock with a thick gel sole is recommended for Diabetic and Rheumatoid Arthritic Patients. The gel layer creates a cushioned, shock absorbing supportable surface while decreasing pressure and friction on high risk areas. Available in White or Black (Black sock has a white interior). This sock may require the use of a shoe with extra depth. **Pr**
